## Meetings:8 meetings held per year, 3 in person, 5 via Zoom. 1 has<br/>been held so far this year with 7 more planned.

### Summary of activities:

The committee continue to provide advice and guidance to the Chancellor and also to parishes. It is difficult to provide accurate figures due to a combination of factors, but very roughly the committee will likely see and comment upon between 20-30 cases per meeting, this does not include delegated cases, List B permissions, and any other questions that may arise as these are all dealt with outside of meetings. It is also difficult to pinpoint specific achievements as there are a myriad of examples, if you were to use that term on a monetary sense then you could look at the progress of the case at Oakley, St Leonard or the advice given to Basingstoke, St Michael. However, just as important to that could also be the new heating system at Woolton Hill, St Thomas for example. Both hugely varying in scale, intervention and cost but equally important in their own right.

### **Aspirations:**

It would be ideal for the committee to acquire an expert in environmental sustainability and to carry out further succession planning, but broadly to continue functioning in a productive and excellent way to support both the Chancellor and the parishes.
