

Unique

- Your fingerprints are one of the many things that makes you unique. They are fully formed at birth and do not change during our lives, unless it's through injury. Even identical twins who share their DNA, will have different fingerprints.
- What else makes you uniquely you? It's tempting to compare ourselves with others, but let's celebrate our uniqueness – and dare to be different!
- What is the unique contribution you can make to the school community this year? What is it about your story that nobody else can bring? How will you use that to help you connect with those around you?
- How can we make sure that we celebrate the uniqueness of every child and individual in our school community?

'Diversity is not about how we differ. Diversity is about embracing one another's uniqueness.'

Ola Joseph
